Comment

For a multi property offer, we need the ability to include multiple hotel properties in the request along with other search parameters such as check-in and check-out dates, room quantity, guest count etc.

Proposed Change

Change FindMultiPropertyOffersRQ/ProductQueriesHospitality/RoomStayQueryProduct/BasicPropertyInfo to repeat allowing for multiple BasicPropertyInfo elements to be sent.

RELEASE NOTES

Library Name: Product

X-Path: Product/RoomStay_Query_Product

-changed number of iterations
--Changed Product/RoomStay_Query_Product/BasicPropertyInfo from a single occurrence to unbounded occurrences. |
